

Associate Professor Michael Gale Jr., PhD

University of Washington, USA

Michael Gale, Jr., PhD, is a Professor (effective 7-1-10) in the Department of Immunology at The University of Washington, School of Medicine. He is an Adjunct Professor in the Departments of Microbiology and Global Health, and is Affiliate Member of the Washington Regional Primate Research Center, and of the Fred Hutchinson Center Research Center, Clinical Research Division. Dr. Gale is the Director of the Center for the Study of Immune Mechanisms of Virus Control at the University of Washington, School of Medicine where his research program is focused on understanding the virus-host interactions that regulate innate immunity against RNA viruses. Dr. Gale is also the Director of the Cooperative Research Center for the Study of Hepatitis C Virus Infection and Immunity, part of a national network of Hepatitis C Cooperative Research Centers funded by the National Institutes of Health. In addition, his laboratory is also a component of the Pacific Northwest Research of Excellence in Biodefense and Emerging Infectious Diseases, where he leads a research program to define therapeutic targets to control pathogenic flavivirus infection. Dr. Gale teaches virology, immunology, infectious disease biology, and public health.
