

2008

Affandi, J.S., Price, P., Imran, D., Yunihastuti, E., Djauzi, S., Cherry, C.L. (2008). Can we predict neuropathy risk before stavudine prescription in a resource limited setting? *AIDS Res and Hum Retroviruses* 24 (10) p1281-128.

Cherry, C.L., Rosenow, A., Affandi, J.S., McArthur, J.C., Wesselingh, S.L., Price, P. (2008). Cytokine genotype establishes a role for inflammation in NRTI-associated sensory neuropathy (NRTI-SN) and predicts an individual's NRTI-SN risk. *AIDS Research and Human Retroviruses* 24(2): 117-123.

Cunningham, A.L., Carbone, F., Geijtenbeek, T.B.H. (2008) Langerhans Cells and Viral Immunity. *European Journal of Immunology*. 38(9):2377-85.

Davis, A.J., Carr, J.M., Bagley, C.J., Powell, J., Warrilow, D., Harrich, D., Burrell, C.J., Li, P. (2008). Human immunodeficiency virus type-1 reverse transcriptase exists as post-translationally modified forms in virions and cells. *Retrovirology* 5, art. no. 115.

De Rose, R, Fernandez, C.S., Loh, L., Peut, V., Mason, R.D., Alcantara, S., Reece, J., Kent, S.J. (2008). Delivery of immunotherapy with peptide-pulsed blood in macaques. *Virology* 378: 201-204. Comment: MHC restricted macaques in study and used MHC tetramers to analyse immunity.

De Rose, R., Fernandez, C.S., Smith, M.Z., Batten, C.J., Alcantara, S., Peut, V., Rollman, E., Loh, L., Mason, R.D., Wilson, K., Law, M.G., Handley, A.J., Kent, S.J. (2008). Control of Viremia and Prevention of AIDS following Immunotherapy of SIV-Infected Macaques with Peptide-Pulsed Blood. *PLoS Pathogens*, 4(5): e1000055. doi:10.1371/journal.ppat.1000055. Comment: Randomised macaques in this study based on extensive MHC typing.

Figueiredo, A., Zelina, S., Sluis-Cremer, N, Tachedjian, G. (2008). Relationship between increased heterodimer stability and enzyme function in HIV-1 reverse transcriptase. *Current HIV Research*, 6, 130-13.

Harrich, D., Apolloni, A., Warrilow, D. (2008). HIV-1 Tat implicated as a key factor in viral spread. *Future HIV Therapy* 2 (4), pp. 323-326.

Kent, S.J., De Rose, R., Mokhonov, V.V., Mokhonova, E.I., Fernandez, C.S., Alcantara, S., Rollman, E., Mason, R.D., Loh, L., Peut, V., Reece, J.C., Wang, X.J., Wilson, K.M., Suhrbier, A., Khromykh, A. (2008). Evaluation of recombinant Kunjin replicon SIV vaccines for protective efficacy in macaques. *Virology*, 374: 528-534. Comment: Randomised macaques in this study based on extensive MHC typing.

Lai, S.K., Hida, K., Shukair, S., Wang, Y.Y., Figueiredo, A., Cone, R., Hope, T.J., Hanes, J. (2009). Human immunodeficiency virus type 1 is trapped by acidic but not by neutralized human cervicovaginal mucus. *J Virol* 83: 11196-11200.

Loh, L., Kent, S.J., (2008). Quantification of Simian Immunodeficiency Virus Cytotoxic T Lymphocyte Escape Mutant Viruses. *AIDS Research and Human Retroviruses*, 24(8):1067-72. Comment: MHC restricted macaques in study and used MHC tetramers to analyse immunity.

Loh, L., Petracic, J., Batten, C.J., Davenport, M.P., Kent, S.J. (2008). Vaccination and timing influence SIV immune escape viral dynamics in vivo. *PLoS Pathogens*, 4(1): e12 doi:10.1371/journal.ppat.0040012. Comment: Key study on escape at MHC I restricted CD8 T cell responses.

Meshkat, Z., Audsley, M., Beyer, C., Gowans, E.J., Haqshenas, G. (2008). Reverse genetic analysis of a putative, influenza virus M2 HXXXW-like motif in the p7 protein of hepatitis C virus. *Journal of Viral Hepatitis*, Epub.

Mason, R.D., De Rose, R., Kent, S.J. (2008). CD4+ T cell subsets: what really counts in preventing HIV disease? *Expert Review of Vaccines*, 7: 155-158. Comment: Review of MHCII restricted CD4 T cell responses.

Petravic, J., Loh, L., Kent, S.J., Davenport, M.P. (2008). CD4+ Target cell availability determines the dynamics of immune escape and reversion in vivo. *J Virol*, 82: 4091-4101. Comment: MHC restricted macaques in study and used MHC tetramers to analyse immunity.

Rollman, E., Turner, S.J., Kedzierska, K., Kent, S.J. (2008). Anti-SIV cytolytic molecules in pigtail macaques. *AIDS Research and Human Retroviruses*, 24(8):1127-31. Comment: MHC restricted macaques in study and used MHC tetramers to analyse immunity.

Rollman, E., Mason, R.D., Lin, J., Brooks, A.G., Kent, S.J. (2008). Protection afforded by live attenuated SIV is associated with rapid killing kinetics of CTLs. *Journal of Medical Primatology*, 37 2:24-32. Comment: Mapped and restricted additional T cell epitopes and developed new MHC tetramers in this paper.

Smith, M.Z., Asher, T.E., Venturi, V., Davenport, M.P., Douek, D.C., Price, D.A., Kent, S.J. (2008). Limited maintenance of vaccine-induced SIV-specific CD8 T cell receptor clonotypes after virus challenge. *J Virol*, 82: 7357-7368. Comment: MHC restricted macaques in study and used MHC tetramers to analyse immunity.

Thammanichanon, D., Moneer, S., Yotnda, P., Aitken, C., Earnest-Silveira, L., Jackson, D., Hellard, M., McCluskey, J., Torresi, J., Bharadwaj, M., (2008). Fiber-modified recombinant adenoviral constructs encoding Hepatitis C Virus proteins induce potent HCV-specific T Cell Response. *Clin Immunol* 128(3):329-39.

Warrilow, D., Meredith, L., Davis, A., Burrell, C., Li, P., Harrich, D. (2008). Cell factors stimulate human immunodeficiency virus type 1 reverse transcription in vitro. *Journal of Virology* 82 (3), pp. 1425-1437.

Woollard, D.J., Haqshenas, G., Dong, X., Pratt, B.F., Kent, S.J., Gowans, E.J. (2008). Virus-Specific T-Cell Immunity Correlates with Control of GB Virus Type B Infection in Marmosets. *J Virol*, 82: 3054-3060. Comment: MHC typed Marmosets based on techniques developed for macaques.
